Evolution Letters

Open Access

COMMENTS AND OPINIONS

- Indirect genetic effects clarify how traits can evolve even when fitness does not 4
David N. Fisher and Andrew G. McAdam

LETTERS

- The evolution of phenotypic plasticity when environments fluctuate in time and space 15
Jessica G. King and Jarrod D. Hadfield
- Predictable genome-wide sorting of standing genetic variation during parallel adaptation to basic versus acidic environments in stickleback fish 28
Quiterie Haenel, Marius Roesti, Dario Moser, Andrew D. C. MacColl, and Daniel Berner
- Recent lake expansion triggered the adaptive radiation of freshwater snails in the ancient Lake Biwa 43
Osamu Miura, Misako Urabe, Tomohiro Nishimura, Katsuki Nakai, and Satoshi Chiba
- Gene flow improves fitness at a range edge under climate change 55
Megan Bontrager and Amy L. Angert
- An evolutionary compass for detecting signals of polygenic selection and mutational bias 69
Lawrence H. Uricchio, Hugo C. Kitano, Alexander Gusev, and Noah A. Zaitlen
- Sexual selection and inbreeding: Two efficient ways to limit the accumulation of deleterious mutations 80
Elsa Noël, Elise Fruitet, Dennyss Lelaurin, Nicolas Bonel, Adeline Ségard, Violette Sarda, Philippe Jarne, and Patrice David
- Bulk pollen sequencing reveals rapid evolution of segregation distortion in the male germline of Arabidopsis hybrids 93
Russell Corbett-Detig, Paloma Medina, Hélène Frérot, Christelle Blassiau, and Vincent Castric
- Multiple infection of cells changes the dynamics of basic viral evolutionary processes 104
Dominik Wodarz, David N. Levy, and Natalia L. Komarova

Aims and Scope

Evolution Letters publishes cutting-edge new research in all areas of Evolutionary Biology. Papers should demand rapid publication because they substantially advance the field, are of outstanding clarity and originality, or are of broad interest. Papers that introduce new analytical or methodological frameworks that are likely to be highly influential will also be considered. Opinion and commentary articles on new developments or emerging themes are also encouraged. Traditional reviews will not be considered, as plenty of appropriate forums for these already exist. The Editor-in-Chief and Editorial Board welcome enquiries about other forms of article. *Evolution Letters* is jointly owned by the European Society of Evolutionary Biology (ESEB) and the Society for the Study of Evolution (SSE). Profits from the journal are invested back into the two societies. The journal is online only and entirely open access. The journal has a flexible approach to the format of manuscripts on submission, and will only ask authors to adhere to a house style (see Instructions for Authors) once the manuscript is accepted for publication.

Open Access and Copyright

All articles published by *Evolution Letters* are fully open access: immediately freely available to read, download and share. All articles are published under the terms of the Creative Commons Attribution License which permits use, distribution and reproduction in any medium, provided the original work is properly cited and allows the commercial use of published articles. Copyright on any research article in a journal published by *Evolution Letters* is retained by the author(s). Authors grant Wiley a license to publish the article and identify itself as the original publisher. Authors also grant any third party the right to use the article freely as long as its integrity is maintained and its original authors, citation details and publisher are identified. Further information about open access license and copyright can be found at <http://www.wileyopenaccess.com/details/content/12f25db4c87/Copyright%E2%80%9393License.html>
